Applicant Initiated Interview Request Form					
Application No.: 09/888,762 First Named Applicant: Yonina C. Eldar					
Examiner: Kevin M. Burd Art Unit: 2611 Status of Application: After Final					
Tentative Participants:   (1)   Sam Pasternack   (2)   James Goodberlet					
Type of Interview Requested:  (1)  Telephonic (2) Personal (3) Video Conference  Exhibit To Be Shown or Demonstrated: YES NO  If yes, provide brief description:					
Issues To Be Discussed					
Issues (Rej., Obj., etc) (1) 102(b) Rej.	Claims/ Fig. #s	Prior Art Bottomley	Discussed	Agreed	Not Agreed
(2) 102(b) Rej.	14	Fukawa			
(3)					
(4) Continuation Sh	eet Attached	***************************************			
Brief Description of Argument to be Presented:  1. Please see attached sheet.					
Please see attached sheet.					
An interview was conducted on the above-identified application on  NOTE: This form should be completed by applicant and submitted to the examiner in advance of the interview (see MPEP § 713.01).  This application will not be delayed from issue because of applicant's failure to submit a written record of this interview. Therefore, applicant is advised to file a statement of the substance of this interview (37 CFR 1.133(b)) as soon as possible.    Sam Pasternack					

This obligation of information is required by 7 CFE 113. The information is required to decide or retain benefit by the public whole in to fit (end by the USFFO to process) an application. Confidentiality is greated by 5 USFFO (and by 100 FEF) and 100 FEF) and 100 FEF in the public of the public

Application No. 09/888,762

## ATTORNEY'S DOCKET NUMBER: 0492611-0395 IN THE UNITED STATES PATENT AND TRADEMARK OFFICE

1<sup>st</sup> Inventor: Yonina C. Eldar Confirmation No.: 9398
Serial No: 09/888.762 Art Unit: 2611

Filed: June 25, 2001 Examiner: Burd, Kevin Michael

Title: Correlation Shaping Multi-Signature Receiver

## APPLICANT INITIATED INTERVIEW RESQUEST FORM CONTINUATION SHEET

## Brief Description of Arguments to be Presented:

- Regarding claim 1, in the presence of noise or distortion, the apparatus of Bottomley
  mathematically cannot produce an output uncorrelated on at least a subspace. The noise is
  common to all correlators and results in the outputs sharing noise information. That is, the
  outputs are correlated, and not decorrelated as the Examiner claims. Applicants seek
  clarification of the Examiner's response.
- 2. Regarding claim 14, the set of signals claimed by Applicants are not the set of signature signals as the Examiner states on page 4 of the Office Action. The error minimization cited in Fukawa by the Examiner (column 19, lines 43-67) pertains to minimization of a difference between a decision output and correlator output. (See Figure 20.) Applicants claim decorrelation signals comprising minimization of error between the set of signature signals and the set of decorrelation signals. The decorrelation signals define the claimed invention in that they are used by the apparatus to process the received signals. Applicants seek clarification of the Examiner's response.
